Why to choose svt?

svt is the go-to **full-service provider** in the field of passive structural fire protection and damage restoration

svt offers the **most comprehensive portfolio of fire protection products** designed for structural engineering and industrial construction, infrastructure as well as industrial applications

svt means "**Made in Germany**", encompassing an in-house research & development centre tied in with production facilities and testing furnaces at five locations

svt is your partner of choice when it comes to delivering **certified standard solutions** and devising **customised solutions that meet the most stringent of fire protection requirements**

Choosing svt means choosing **50 years of experience**

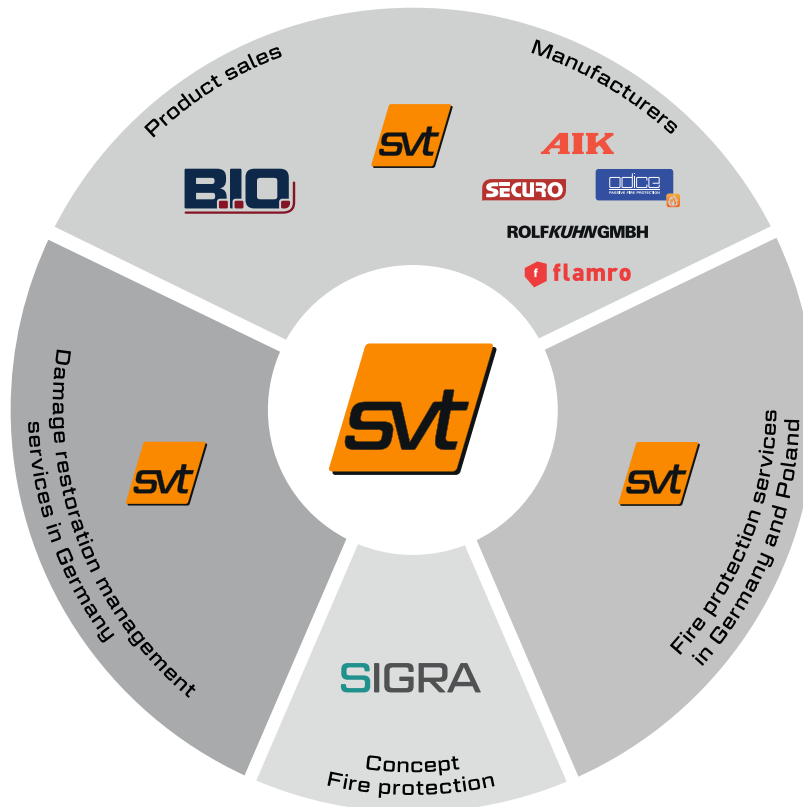

The svt Group

svt supplies well-established brand products and solutions from one single source imbued with many decades of experience.

Protect your values.

At work around the world

Our diversified product range, which has an international track record of proven performance encompassing over 40 years, is sold through our ten foreign subsidiaries and a network of partners in more than 50 countries.

Our product portfolio includes:

- Firestop barriers for cables, for combustible and non-combustible pipes as well as for ducts and conduits
- Intumescent and ablative paints for cables and structural steel
- Wraps, collars, pillows, caulks, fillers and other materials
- Fire protection compounds, sealing systems, granulates, firestop boards, glazing blocks and strips

... all products MADE IN GERMANY.

By the way: svt Group not only boasts an exceptionally broad array of products and systems, but also offers a comprehensive service of knowledgeable advice and guidance on how to use them for optimum benefit. Questions revolving around the topic of fire protection in general are also welcome.

Please feel free to contact us – we will be happy to assist you!
