

Novasit BM

8.4.2 Design variant with fire protection collar AWM II / Variant N II A

- In wall seals two fire protection collars AWM II / Variant N II A must be installed on both sides of the wall. In floor seals one fire protection collar must be installed on the lower side of the floor.
- Pipes must be arranged vertically to the surface of the building element.
- The penetration sealing may only be used on pneumatic conveyors, compressed air lines etc. if the pipeline system is switched off in the event of a fire.
- Optionally a noise insulation ≤ 5 mm may be installed.

Design for wall and floor penetration seals

For thicknesses and design variants, see page 29

All specifications in mm
